

TouchReservation

## Reservations online

---

TouchReservation offer  
diners the ultimate in  
choice and flexibility

# Free your staff, *empower* the customer.

You're never closed with TouchReservation. Allow customers to make bookings, around the clock, on any web-enabled device such as smartphone or tablet.

TouchReservation is the perfect accompaniment to ICRTouch's famous till software TouchPoint. Reliable and proven, TouchPoint has been developed over 20 years and it remains cutting edge. For a top class experience, even before your customer enters your restaurant, choose TouchReservation.

## Stay open *24/7.*

## Be table *Smart.*

**Reservations around the clock.  
No double bookings.**

---

TouchReservation is smart. It won't allocate that tiny table in the corner to a party of six. It automatically allocates tables based on the number of guests. For the diners who book over the phone, or who walk in without a reservation, TouchReservation allows front of house staff to allocate tables at the till, updating the floor plan accordingly.

TouchReservation doesn't stop taking bookings when your kitchen is closed and it doesn't panic when the dinner rush starts.

## Free Up Your Staff.

Staff aren't tied up on the phone for those customers preferring to use online services.

## Around The Clock Bookings.

Customers can make bookings at their leisure, either from the comfort of their homes to a busy day in the office at any time of day, or night.

## Reduces Administration.

Administration tasks are reduced with automated table allocations, order notifications and auto-confirmations.

## No Mistakes.

TouchReservation and TouchPoint stay in sync and share the same table plan, so it is always up-to-date and you never double book.

## Transparent Pricing.

Easy to manage fixed pricing that won't break the bank, with no per table licensing or transaction charge.

## Your Branding.

TouchReservation is custom branded to suit your business and fit your current website.

## Plan Ahead.

Table reservations help you plan ahead for the night, know when to expect a big party and when to call in more staff.

# Give your customers flexibility.

## Customers on the go...

Tonight's table seven could be out on the town right now and they're looking for somewhere to dine on their smartphone.

TouchReservation is optimised for mobile devices, allowing reservations to be made on the move.
